Top 5 SuperCategories

We measure the typology of user paths. The first of these, the top level, is Supercategory.

[1] "Not enough data"

Top 5 Categories

Under Supercategory, here you can see a bit more about the granularity of the user needs. Only the top few Categories are shown.

[1] "Not enough data"

Case specific issues

And lastly, we have case-specific issues. Again, we're only showing the highest issues.
